

[Jobs](#) / Lead Backend TypeScript Developer

# Lead Backend TypeScript Developer [Apply Now!](#)

📍 Vienna, Austria

## Who we are

We are an innovative and international team that is striving to bring seamless fiscalization to everyone. We are doing that by implementing a unified API, which currently solves the needs of the Austrian and German markets for PoS compliance. Still, our vision is to become the #1 fiscalization API provider for the whole of Europe!

## What you'll be working on if you join

- You'll be part of one of our teams formed out of 3 to 5 people, with an end2end delivery responsibility. We achieve this by having a Continuous Everything approach (GitOps).
- You'll be working on one of our core components for the fiscalization solutions we provide for Austria or Germany
- You'll have the chance to take care of the development, deployment, and monitoring of the software you and the team will create
- You'll define the requirements needed for development
- You'll act as the lead for your team and together with them take the ownership of the topic you work on
- You'll also create the documentation needed for internal and regulatory purposes
- Last but not least, you'll get the chance to shape how the future of our solutions will look like

## You will be a fit for our team if

- You have at least **3 years** of experience in TypeScript development
- You have experience working with DBs (SQL, NoSQL)
- You have experience working with Docker
- You have experience in leading teams and defining requirements
- You have a solution-oriented way of thinking
- You have the ability to communicate ideas and concepts to non-technical colleagues
- You have team spirit and ability to work in a team
- You have an EU work permit
- You are fluent in both **German** (level **B2** or higher) and **English** (level **B2** or higher)
