

Amiblu®

Are numbers your thing? Do you find it easy to analyse complex issues? Are you looking for internationality and cooperation with colleagues throughout Europe and beyond?

Then apply today - we look forward to receiving your application (tabular CV, salary expectations, availability)! Please send it to jobs@amiblu.com.

In the course of digitalisation, we are currently building a team of data managers and analysts and are looking for a **Data Analyst**.

Amiblu is the leading specialist in glass fibre reinforced plastic pipe systems for rainwater, wastewater, drinking water, irrigation, hydropower and industry. The Amiblu Group is active in 110 countries around the globe, employing around 1,500 people.

The remuneration for this position is around EUR 50,000 per annum on a full-time basis. Of course, we reward qualifications and position-related experience according to market standards.

Data Analyst m/f/d

What are the tasks?

- You design BI reports and dashboards in Microsoft Power BI
- You develop and consolidate new key performance indicators for the management and evaluation of our product portfolio together with the specialist departments
- You design and implement data-based projects
- You proactively coordinate with the stakeholders of the business units when creating ad hoc key performance indicator analyses
- In your interface function, you work directly with the Sales, IT and Controlling departments

What do we look for?

- Successfully completed studies in the field of economics, business engineering, computer science, mathematics or a comparable education.
- Experience in the development of KPIs as well as in data transformation
- Good knowledge in the area of data analysis as well as in its visualisation with Power BI
- Good knowledge of Microsoft Excel and basic knowledge of SQL and data management
- Analytical, structured working style combined with a good grasp of numbers and a strong understanding of business contexts and processes
- Very good written and spoken English, German is an asset
- Very good knowledge of MS Office (especially Excel)
- SAP skills are considered as advantage

What do we offer?

- Great individual scope for creativity
- Induction and training
- Further development in the field and beyond
